THIS IS UNEVALUATED INFORMATION

50X1-HUM

Location and Manpower

1. [redacted] Small Motor and Machine Factory (Kismotor es Gepgyar),
located at Fehervari ut, Budapest. The factory employed between 200 and
300 individuals. It operated three shifts six days a week.
Working conditions
were crowded for machinery and workers in the first shift. There were
fewer employees working the second and third shifts. There was no more
room for machinery but the plant could hire more workers for the second
and third shifts.

2. [redacted] a rough sketch of the facilities of the Small Motor and Machine
Factory. /Enclosure A is sketch of Factory. With Legend. No Scale./

50X1-HUM

Items Produced

3. [redacted] it was still producing the same items in
1956: generators (small, medium and large) gas and diesel operated;
and also outboard motors.

Quantities Produced

4. The total number of generators (all sizes) produced was between 30-40 per
month. About one-third were small, one-third medium and one-third large
generators. This factory assembled six to twelve large diesel generators
per month. About one-half of these were for Hungary and one-half for the
USSR. When assembled these diesels carried the brandname Ganz rather
than Kismotor. The small generators were produced for the Hungarian Army.
5. Parts for the generators and outboard motors were not all produced at this
factory. Most of the parts were brought to the factory, a few were made
there and the entire unit was assembled at the plant.

Legend to Enclosure A - Sketch of Facilities at the Small
Motor and Machine Factory

1. Fehervari ut
2. Dombovari ut
3. Open square
4. Wire fence, cyclone type, about two meters high.
5. Gate
[redacted]
6. Porter's House. Two men on duty during day and one at night.
7. Residential Buildings. Five stories high, brick, painted gray with V-shaped and tiled roof. Solid wall on plant side separated tenants from plant. The entire length of Number Seven is 120 meters and width 50 meters.
 - a. First floor of this section was plant's cultural hall.
8. Machine shop. One-story, 40 meters by 70 meters, painted buff. This shop contained three horizontal lathes, some metal planing machines, milling machines, and buffing machines. About 15 individuals worked here during the first shift and four during the second and third shifts. Most of the machinery was new in 1952-1953. Some were French, German, and one machine was Soviet. This shop also contained one overhead crane.
9. Machine Shop. One-story, brick. It contained about 20 lathes, about 15 small milling machines, three grinding or buffing machines and from eight to ten Hungarian drill presses. About three-fourths of the lathes were Czech SKODA products.
 - a. This section of the machine shop was four-stories high. The products were assembled on the first floor. Offices were located on the second floor and probably assembly shops on third and fourth floors. Basement contained locker rooms and wash rooms.
10. [redacted] Purpose of building unknown. A one-story structure, about 15 meters by 20 meters. 50X1-HUM
11. Storeroom and Metal Cutting Shop. One-story building, 25 meters by 25 meters, brick, painted buff.
12. Apartment building, separate from plant. It was a five-story structure.
 - a. This is a solid brick wall about two meters high. No gate.
13. Dining Hall. One-story building, 40 meters by 50 meters, brick, buff painted. It was in process of construction in 1953.
14. Double-tracked standard gauge railroad.
15. Sidewalks.
